Blockdudes
Frontend Developer

Dear Amrit Kumar Jain,

I trust this message finds you well. My name is Parth, and I am writing to express my genuine interest in the Software Developer role at Blockdude Services. I recently graduated in 2023 with a background in Mechanical Engineering, and my journey has taken a transformative turn into the dynamic field of software development.

My skill set encompasses proficiency in React, TypeScript, Next.js, and the MERN stack. Beyond Frontend and Backend development, I possess foundational knowledge in AWS and specialize in testing frameworks such as Jest. The prospect of creating end-to-end software solutions greatly excites me, and I am eager to leverage my skills with the resources provided.

My project portfolio reflects my hands-on approach to problem-solving. From satellite metadata mapping to full-stack admin dashboards, social media apps, web streaming applications, and car rental systems, each project on my GitHub showcases my commitment to delivering quality work.

I am drawn to Blockdude Services because of its focus on Custom Blockchain Solutions, Web Development, Smart Contract development, Subgraph development, and NFT development in Solidity/Rust. I am enthusiastic about contributing to your innovative projects and being a part of the Web3 future.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills align with the vision and goals of Blockdude Services.

Best Regards,

Parth
